Subject: Re: Declined: Floyd Hill - EA Comments and Updates

Hi Julie!

Ex. 6 Personal Privacy (PP)

Feel free to bring anyone from the EPA who would like to attend the field trip. I mentioned it this morning during the meeting and we're completely fine with that - the more the merrier! The meeting this morning went pretty well with Laura and Chris and I'm glad that we're forming a working relationship with each other. I will be sending the I-270 air quality reports to you guys today and I mentioned that to Chris and Laura earlier, but wanted to make sure you knew they were coming as well since you're the lead on that one.

If you still want to chat, we can set up some time. I'm going to be taking a leave of absence beginning next Tuesday for some health challenges that I'm dealing with, so I'm only available through next Monday.

Thanks!
Vanessa

I would like to connect with you later today to chat about the field trip planned for later this month. I reported out to our team about the good work that is going on, particularly with implementing some of the information gained through the use of the stream tool on the ground and there is a good amount of interest in some folks coming along for that experience. I will be back in the office at 1:00 pm today and will try to catch you to chat. I hope your morning is going well.

Best - Julie
